IONTO-COMFORT Xtension

Unique  
and Innovative

**Unparalleled in functionality and comfort,  
this TREATMENT CHAIR meets every demand**

IONTO-Komfort Xtension can be easily brought into a flat position via the remote control and upon convenience massages. The fold-down armrests are upholstered on both sides and you can extend the headboard by 12 cm, thus offering your customer sufficient comfort even in the lying position.

By finger pressure, you can individually set the optimum seat depth yourself during treatment . For this purpose, a control knob attached to the armrest by the length of the seat can be varied by 10 cm.

**From seat to bed!  
Seat depth adjustment is diverse for  
optimum seating comfort of different  
body sizes.**

Skin Analysis & Hair Diagnosis Machine

# aram

## APM 100

### Skin Analysis & Hair Diagnosis Machine

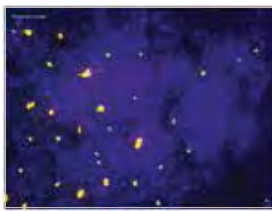

#### SKIN ANALYSIS IN A HANDY FORMAT-PAVES THE WAY TO PRECISE EXAMINATION

The epidermis is the focus of almost every dermo-cosmetic treatment. In order to achieve optimum results, a professional skin analysis is indispensable. The better you recognize for example moisture, fat content, pores, wrinkle structure or pigmentation, the optimal treatment concept for maximum results can be compiled.

This technical skin analysis increases the competence and safety in medical history significantly.

#### Features

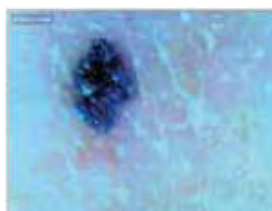

- Menu guidance via touchscreen display is possible
- Integrated measuring sensors in order to determine skin hydration
- Immediate evaluation of the images by software in the camera
- Comparison of images with stored images as a guideline
- Option of creating a customer file and saving the measuring results
- Provides an overall skin assessment
- Internet access
- Data transfer via Bluetooth and USB
- Screen transfer via WiFi and HDMI
- Photographic camera with image memory, Large- 4inch display, convenient and smart operation

## Cryo 6

### The Cold Air Device From the World Leader

**Cryo 6 is intended to minimize pain and thermal injury during laser and dermatological treatments, also used for temporary topical anesthetic relief during injections.**

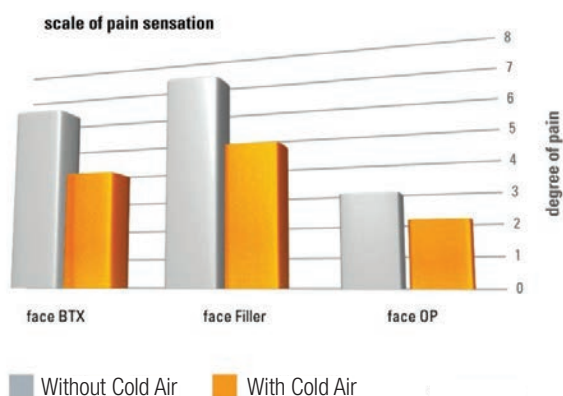

It is also intended to minimize pain during tattoo application, tattoo removal, RF, laser hair removal and much more. The device can assist in a variety of applications and is particularly useful with cosmetic procedures.

Unlike other cooling methods, such as contact cooling, cryogen spray or ice packs, the Cryo 6 can cool the epidermis before, during and after the laser energy has been applied, without interfering with the laser beam.

### The Perfect System for Skin Cooling – Especially for Laser Treatments and Injections.

Cryo 6 is the perfect chiller system for cooling the skin in laser applications and injections of any kind. The cold air device reduces the pain sustainably and minimizes thermal damage to the skin in laser and IPL applications.

Studies have shown that skin cooling with the Cryo 6 cold air device reduces patients' pain and sensitivity. As a result, treatments can be tolerated significantly better. The below graph shows an illustration of these findings in a pain scale study by Dr. Steinert.

### Technical Data

Power Supply	115V / 60Hz
Power Input Max	1 KW
Stand-By Function	260 W/h
Protection according to IEC 601-1 Class I, Type BMDD/MPG:	Class IIa
Treatment tube length	6 ft
Housing Dimensions	H 25" / W 15" / L 27"
Weight	132 lbs ( including glass ploate)
Therapy Air Flow	9 levels, max 1000 l / min

# MELAtronic® 23 EN

## The Most Innovative Universal Sterilization Device Typ-S Program

The MELAtronic ® 23 EN represents the ideal standard steam sterilizer for the sterilization of wrapped and unwrapped instruments. Its high-quality stainless steel chamber, safety features and components ensure many years of reliable operation. This has been tried-and-tested over many years.

The MELAtronic ® 23 EN works in accordance with the fractionated flow procedure and complies with all the requirements EN of 13060 **Type S Programs**. The microprocessor control provides a fully-automatic control of the program. The two-row display shows the operating state, the integrated water quality measurement and the operation information, thereby ensuring simple, safe and easy operation.

### The special advantages of the MELAtronic 23EN:

- Reliability
- Simple, easy operation
- Complies with EN 13060
- Secure documentation
- Fractionated flow procedure
- Fully-automatic program control
- Integrated water quality monitoring
- Medical grade hightech sterilizer (up to 134°C)

Item Code  
67530

### Technical data

Exterior device dimensions (W x H x D):	52 cm x 38 cm x 59 cm
Chamber (Ø x depth) / volume:	23 cm x 45 cm / 19 litre
Tray (art. no. 00230):	42 cm x 19 cm x 2 cm
Maximum load:	4 kg instruments (unwrapped) 2 kg instruments (wrapped)
Electrical connection:	240-220V; 60/50Hz; 1600W
Empty weight:	32 kg

**The memory of the electronic control stores the last 40 program logs permanently. Documentation is performed via the serial interface**

## Wide choice of programs:

The MELAtronic ®23 EN is equipped with four sterilization programs. The Universal-Program and Prion-Program (both 134 °C) are intended for the sterilization of small quantities of wrapped massive instruments. The Quick Program (134 °C) can be used to sterilize unwrapped instruments; the Gentle-Program uses a lower temperature of 121°C to sterilize temperature-labile, massive instruments (unwrapped).

## An innovative water system – instrument protection

The quality of the distilled or demineralized water used is decisive in ensuring the protection and value-retention of the instruments. The conductivity measuring device integrated in the MELAtronic 23EN monitors water quality and issues a warning should it fail to correspond with the requirements placed on a value-retaining decon-tamination process. The MELAtronic23 EN provides the choice between the water-saving circulation system or the single use system, which uses fresh water for every sterilization run.

Programs	Sterilization time	Program run time*
Universal-Program	5.5 min	34 min
Gentle-Program	20.5 min	50 min
Quick-Program	3.5 min	24 min
Prion-Program	20.5 min	49 min

\* depends on the load and the chamber temperature upon program start

## HiClean

Sterilization pouch - Size: 90 mm x 260 mm
